CITY GOVERNMENT, 1893-94.

HON. CHARLES P. BERRY, Mayor.

SAMUEL R. GARDNER, City Clerk.

Aldermen.

Ward 1.

Samuel Maddock,

Flagg F. Grant.

Thomas Leary,

Ward 2.

Michael J. Griffin,

Samuel F. Ham.

Andrew P. Wendell,

Ward 3.

George W. Scott.

Ward 4.

Robert W. Phinney,

Horace W. Gray.

Common Councilmen.

AUGUSTUS N. WELLS, President.

Ward 1.

Augustus N. Wells,
Willard S. Fernald,
George R. Palfrey,

Frank C. Langley,
Eugene J. Sullivan,
Fernando W. Hartford.

Ward 2.

Mortimer L. Raynes,
Samuel T. Drew,
Thomas P. Jones,

Joseph Y. Forsyth,
James D. Brooks,
Louis Schwarz.

Ward 3.

John Burns,

Daniel Collins.

Ward 4.

Daniel N. Cox,
Henry M. Gregg,

Charles E. Grover,
Willie J. Sanborn.

CHARLES E. SENTER, Clerk.

Assessors of Taxes.

William P. Bennett, Theodore G Perkins, John Conlon, Solomon Littlefield, Samuel P. Treadwell, Allison S. Littlefield, Frederick S. Wendell, Harry J. Freeman, Stephen A. Preble.

Overseers of the Poor.

John Holland, Thomas Mitchell, Dennis J. Carroll, Freeman Pearson.

Fire Department.

Chief Engineer, Herbert A. Marden.

Assistant Engineers, George A. Jackson, Willard M. Gray, Willard J. Sampson, John Turner.

Clerk, Daniel C. Church.

Superintendent of Fire Alarm Telegraph, Wilbur I. Trafton.

Police Department.

Justice of Police Court, Charles E. Batchelder.

Special Justice, Thomas E. O. Marvin.

City Solicitor, Ernest L. Guptill.

City Marshal, Jefferson C. Rowe.

Assistant Marshal, Daniel Casey.

Day Police, John P. Tibbetts, Michael Hurley.

Captain of the Night Watch, John S. Wendell.

Night Watchmen, Charles H. Foote, Cornelius Reagan, Cornelius Quinn, James Kehoe, Daniel J. Lynch, Michael Kelley, James Quinn, Richard D. Smart, Dennis Murphy.

Board of Instruction.

Chairman, Charles P. Berry.

Secretary, John C. Simpson.

Alfred Gooding, Calvin Page, Richard I. Walden, Albion Littlefield. Terms expire Aug. 1, 1896.

Charles A. Sinclair, Andrew P. Wendell, Ira C. Seymour, William L. Conlon. Terms expire Aug. 1, 1895.

Charles E. Batchelder, David Urch, William O. Sides, William H. Moore. Terms expire Aug. 1, 1894.

Trustees of Public Library.

President, Charles P. Berry.

Three Years, Frank Jones, Edward P. Kimball.

Two Years, Andrew B. Sherburne, Emma J. W. Magraw.

One Year, William H. Sise, Mary A. Foster.

President of Common Council, Augustus N. Wells.

Treasurer, Charles A. Hazlett.

Librarian, Robert E. Rich.

Portsmouth Water Works.

Water Commissioners, John H. Broughton, Calvin Page, J. A. Farrington, Charles P. Berry, Mayor, ex officio.

Other City Officers.

City Treasurer, Samuel P. Treadwell.

City Messenger, Daniel C. Church.

Collector of Taxes, Walter H. Page.

City Physician, Benjamin Cheever.

Street Commissioner, Joseph R. Holmes.

Superintendent City Farm, William L. Philbrick.

Surveyors of Highways, Charles H. Miller, District No. 1; George E. Gove, District No. 2; Andrew Sherburne, District No. 3; Andrew J. Sides, District No. 4; Ernest H. Rand, District No. 5; Dennis Shea, District No. 6; Washington I. Drake, District No. 7.

Health Inspectors, Benjamin Cheever, John W. Kelly, Ira C. Seymour.

Inspector of Petroleum, Frank Horrocks.

Sealer of Weights and Measures, John H. Wells.

Harbor Master, Patrick D. Corcoran.

Port Wardens, Daniel Littlefield, Howell C. Russell, Charlie N. Newton.

Lot Layer, Henry S. Paul.

Keeper of Powder Magazine, Andrew P. Wendell.

Fence Viewers, Jefferson C. Rowe, Nathaniel K. Raynes, Abram S. Waldron, Charles W. Norton.

Surveyors of Lumber, Benjamin M. Parker, Thomas E. Call, Daniel Littlefield, Frank C. Sides, William D. Varrell, Howe Call.

Weighers, Hiram F. Williams, James M. Salter, Otis F. Philbrick, William P. Pickett, Arthur W. Walker, Gardner J. Greenleaf, Abram S. Waldron, Frank Langley, John E. Dinick, James Crowley, Willis E. Underhill, John E. Milton, Ira C. Burnell, Flagg F. Grant, Charles H. Abbott.

Measurers of Wood, Benjamin M. Parker, Daniel Littlefield, Hiram F. Williams, Otis F. Philbrick, Arthur W. Walker, Charles E. Walker, James S. Wood, Frederick W. Rogers, William P. Pickett, James M. Salter.

Inspectors of Flour, John Parkin, James W. Sowersby, Henry A. Yeaton.

Inspectors of Check Lists.

William E. Littlefield, Charlie M. Newton, John L. Frisbee, James D. Brooks, Michael F. Canty, Henry M. Gregg, Samuel R. Gardner, Clerk.

Selectmen.

Ward 1.—Augustus N. Wells, Daniel F. Sullivan, Frank P. Garland.

Ward 2.—George J. Cloutman, Benjamin M. Parker, John H. Wells.

Ward 3.—James G. Locke, Frank G. Sherburne, John Jones.

Ward 4.—Willard M. Gray, Albert E. Grover, William P. Murphy.

Moderators.

Ward 1.—Ira C. Seymour.

Ward 2.—True L. Norris.

Ward 3.—Alexander Dawson.

Ward 4.—Richard T. Call.

Ward Clerks.

Ward 1.—Fred H. Ward.

Ward 2.—John W. Kelly.

Ward 3.—William Cogan.

Ward 4.—Charles E. Senter.

Inaugural Address

OF

HON. CHARLES P. BERRY, MAYOR.

GENTLEMEN OF THE CITY COUNCILS:

In accordance with the city charter we have met here today to organize the city government for the ensuing year.

Under the oaths we have just taken we have obligated ourselves to a faithful performance of all the requirements to the establishment of such a government as shall be for the best interests of the whole city, both for the present as well as the future, and I trust we shall perform the various duties incumbent upon us to the best of our ability, ever remembering, as practical men, that in public service, as in private business, the chief aim should be to see that at all times we get value received.

In conformity to the custom of my predecessors on the occasion of inaugural ceremonies, I take this opportunity of calling your attention to some matters that are likely to come before you during the present year of municipal government.

Although I have the advantage of two years of service as a member of the board of aldermen, I feel now that, in this new capacity, I shall be obliged to rely upon the better judgment of the members of this board on many matters that will demand my attention, and I trust that such recommendations as I may from time to time make, will be such as to merit your approval; and that I shall have your hearty support in all matters pertaining to the conduct of city business.

Our city is now in a prosperous condition. Our citizens find profitable employment at home, and are generally happy and contented. Our real estate owners find ready occupants for their houses, and in many instances our people are building for themselves new and comfortable homes, in view of brighter prospects and the continued well being of the entire community. The inducements to such prosperity come in a measure

from the fact that our city affairs are honestly and carefully conducted. It is therefore our duty to be faithful to the trusts committed to our care, that we may be worthy of, and continue in the confidence of our constituents.

FINANCES.

The matter of incurring indebtedness and raising funds necessary to meet current city expenses is of first importance, for upon it depends the successful carrying out of all the plans for the welfare of the city. If we desire to induce people to take up their residences here, we must show them that our finances are well managed and that the rate of taxation is no higher than in other cities affording equal advantages. And our citizens already here will be discontented and justly complain when they see financial matters adopted by those acting for the city, which careful and prudent men would not follow in their own private business.

The fact that the credit of our city is exceptionally high among the cities of this country, and that our bonds bearing a low rate of interest have sold the past year at a considerable premium, is of course very gratifying to every good citizen, but it should not serve to make us any the less watchful over the treasury, or any more ready to vote away money not actually needed for the legitimate purposes of a municipality.

If you all act in the affairs of the city with the care and good judgment which characterizes the conduct of your private business, I am sure that when, at the close of the year for which we have been elected, we retire from office, we shall leave the finances and credit of the city in the same good condition in which we find them today.

Not including the bonds issued to purchase and construct the new water works, and the bonds issued to pay for the stock owned by the city in the Portsmouth & Dover railroad, the bonded indebtedness of the city amounts to \$184,500, all bearing interest at four per cent. Of this amount \$2,000 fall due on the first day of April next, for the payment of which it will be our duty to provide.

The floating debt of the city amounts to \$35,000, and in addition to this, the county tax of \$23,336.93 for the year has not been paid. It is true that we shall have money coming in for taxes, and we have some money on deposit in the bank, but these amounts will be required for payment of current expenses.

If it is to be necessary for the city to continue each year to borrow any considerable amount of money in advance of payment of the taxes, and it is not deemed wise to increase the rate of the taxes, in order to pay these loans and furnish sufficient funds in addition for managing the city affairs to the end

of each fiscal year, the question as to what is best to be done ought now to be settled by you instead of being postponed to another year and putting the responsibility upon the next city government which in turn will put it upon the next.

The total amount of the debt, whether represented by long term bonds or by short time notes, or by both, will be the same. If long term bonds at four per cent. interest will sell at a premium, and short notes must bear six per cent. interest it would seem possible to save a large amount in interest by funding the floating debt, even though it would cause an apparent increase in the indebtedness.

I commend the subject to your careful attention.

The "water bonds" amount to \$310,000, and the interest upon them is paid by the board of water commissioners.

The bonds issued to pay for the stock in the Portsmouth & Dover railroad now outstanding amount to \$173,000, of which \$160,000 bear interest at the rate of four per cent., and \$13,000 due in 1897 bear int. at the rate of six per cent. The payment of the int. of these bonds is more than provided for by the six per cent. dividends upon 1,720 shares of stock in the railroad, which are now held by the city, and which are of greater value than the indebtedness outstanding on their account.

Besides this stock the city has the sum of \$23,724.29 in cash, realized from sales of stock, which amount is applicable to the redemption of these bonds.

All further information you may desire upon this subject will be found in the account of the receipts and expenditures of the city for the past year, which has been published and distributed in the "city book."

THE STREET DEPARTMENT.

The department of streets is one of the most expensive and perhaps the most difficult to provide for to the satisfaction of officials of the city government as well as the citizens generally.

There is a great diversity of opinion as to what are proper, and what improper expenditures in this department. They are nearly as numerous as the number of our inhabitants.

Although large sums of money are annually spent on our thoroughfares, they are not in such a condition as is desirable. This is no doubt in a measure due to the fact that all streets have been and are still being opened up for the laying of the new water and gas mains.

When this work is completed it will be necessary to spend considerable time and money upon them. While a portion of the money charged to streets is expended for other purposes the amount seems very large for the amount of work done, and

I believe there is opportunity for making the appropriation go farther than it does.

In my opinion there should be a decided change in the conduct of this department that we may get the most for our money.

The present street commissioner has been an able supervisor of the work he has been directed to perform, but has been handicapped many times by outside interference which has had a demoralizing effect upon this work, and the men employed to aid him. It has been the custom for many years past for individual members of the city councils to dictate when the work of this department shall be performed and who shall be employed. The result is, that if much of the taxpayers' money has not been absolutely wasted it has been extravagantly expended. It is my candid belief that much more efficient work can be done, and at a less expense, if this practice is discontinued. I therefore feel it my duty to our citizens to recommend that steps be at once taken to place the employment of laborers for the street department beyond the dictation of individual members of the city government. Such action of ours will, I am sure, meet with the hearty approval of all taxpayers.

CITY SCHOOLS.

The schools of our city are in a condition that every citizen in Portsmouth may well be proud of, and will compare favorably with the schools in any of the other New England cities. Although the annual expenditures for school purposes amount to more than \$30,000, I am of the opinion that the money has been generally judiciously expended under the direction of the members of the school board.

The school buildings are now, most of them, in excellent order, and well calculated to accommodate the scholars in such sections of the city as they are located. The board of education think that the recent growth of our city demands, in some portions of it, more room.

My predecessor in office recommended some changes and repairs in different sections of the city calculated to give better accommodations at the South and West ends. I desire to call attention and to recommend an early study of the situation.

Some months ago the board of aldermen discussed at some length the question of repairs upon the Cabot street school buildings, but arrived at no final decision. This project should again be carefully considered. I am of the same opinion now as then, that if that building can be put in suitable condition for a sum not exceeding \$3,000 that it would be the wisest

course to pursue and would serve the city well for some years, thereby saving a much larger expense.

A liberal expenditure for suitable school buildings should not be regarded as extravagant. School edifices are lasting memorials to those who provide for their erection. They will prove of lasting benefit not only to our children but to our children's children. It is therefore wise as well as economical when providing for the present, to think of the future.

SEWERS AND DRAINAGE.

The question of drainage is of vital importance and is one which we shall soon be called to discuss and act upon. A good system of drainage has much to do with the comfort, and is conducive to the good health of our citizens. At present the system of sewers in our city is crude indeed, and it seems to me to have been the object of inexcusable neglect.

Modern sanitary arrangements and the coming use of high service water pipes will make it absolutely necessary to make radical changes and extensions to the present lines of sewer in our city.

The northern side of the city is well provided with a main line by the north pond sewer. The south pond, though perhaps not so disagreeable to our citizens as was the north pond before the construction of the new sewer there, is in a bad condition and must be taken care of in a similar manner. It will be necessary to lay sewers in the streets where they are not adequate. It has been the custom in years past to lay sewers promiscuously, wholly disregarding future needs or effort toward a systemized plan. Were the drains of our city uncovered, they would, no doubt, be found running across lots, and forming a most intricate tangle, the unraveling of which would puzzle the shrewdest of engineers.

I believe that all lines of sewer should be laid on public property, and that no person should be allowed to construct any sewer or portion of the same without first obtaining a permit from the proper authorities. It should also be the duty of some duly authorized person to see that such permits when granted are in compliance with some well considered plan, and that all details are carried out in accordance with rules laid down by the city government. I would also here call your attention and ask for your consideration of the state law which makes it necessary for real estate owners in all thickly settled portions of the city to provide a proper and suitable drain to the public sewer, whenever there shall be one within 100 feet of their building; an early consideration of this question is therefore recommended.

I am of the opinion that we should employ a competent engineer to make a plan for our use ; and at the proper time the issue of bonds to a sufficient amount to cover the cost of construction of such sewers as it is found absolutely necessary to lay, more especially the main one required at south pond.

THE WATER WORKS.

The work on the new water system is rapidly approaching completion. The main lines of pipe have, I believe, all been laid, and the work of making house connections is progressing favorably and the old system will cease to be operated at an early date.

The water commissioners have, I believe, acted upon what seemed to be the most feasible plan for completing this work ; and have been as careful of charges as the circumstances would allow.

Generally our citizens are satisfied that the improved facilities for obtaining water, and the increased volume of it will more than offset the expense attending the acquirement of the new service.

THE CITY FARM.

The city farm is much larger than the needs of the present occupants demand, and, as was the case a year ago, there is a demand for house lots in that section of the city. I therefore recommend the division of some portion of it into house lots and the sale of the same.

FIRE DEPARTMENT.

The fire department of the city remains in the same condition as in past years. The apparatus is kept in good order, and the firemen are prompt and efficient.

There is some discussion in relation to certain changes that may be made to advantage now that the new fire hydrants are ready for use. I am not at this time prepared to offer an opinion as to just what these changes should be, but would ask you to give the matter your attention, as the efficiency of this department is a matter of great importance to the city ; and if one or more steam fire engines can be dispensed with, and hose wagons substituted in their places to advantage, it is apparent that economy demands such action on our part.

POLICE.

The police force of last year fulfilled the various duties of that department, and I have no recommendations to make in

regard to it. There has been no serious trouble to demand the attention of the force. The general good order of our citizens is commendable and speaks well for the character of the community. Our police have offered all the protection required and I believe this branch of the city government has been efficiently managed during the past year.

THE STREET LIGHTS.

The city is now very well lighted by gas and electricity furnished by the Portsmouth Gas Light company. A large number of arcs and some incandescent lights are maintained, and all sections of the city seem to be well provided for in this respect. If I were to make any suggestion in regard to street lighting I should say that the lights should be kept burning until daylight rather than until one o'clock as at present.

BOARD OF HEALTH.

Such work as is usually performed by the officers of the board of health has not in past years been considered of such importance as to warrant the expenditure of much time or money, and has therefore been the object of too much neglect.

I believe that this department is deserving of more attention. It is especially important that the more densely populated portions of our city should be watched by the persons who are selected as health officers, that disease breeding filth may not accumulate.

There have been cases where nuisances have been allowed in places where they are most dangerous, and without prompt execution on the part of the proper officials, might have done great harm. I am informed by the chairman of the board of health that much that might have been done in past years, has been impossible on account of the lack of funds, and I would suggest that you consider the question, whether it would not be wise to increase this appropriation somewhat, thereby promoting the efficiency of this department.

IN CONCLUSION.

I would say that there are various improvements apparent to us all, that might be made about the city, but as it is necessary for us to be careful in expending the limited appropriations we have, it would not be profitable to refer to them at this time.

We should at all times be impressed with the importance of the trusts submitted to our care. Our city is growing in size and prosperity and we must do what we can to aid in a strong and healthy growth.

Those who have placed us in our official positions will expect us to exercise the best of judgment in making appropriations, and will be close observers to see that the same are expended with economy.

Let us so fulfill the duties we have this day assumed that we may reflect credit upon ourselves, and assist in maintaining the good name of our beautiful city.

RECEIPTS AND EXPENDITURES

UNDER THE SUPERVISION OF THE

Board of Mayor and Aldermen,

FOR THE YEAR ENDING DECEMBER 31, 1893.

EXPENDITURES.

State Tax.

Total number of lodgers	1155
Total number of arrests and lodgers	<u>1850</u>
Amount collected and paid City Treasurer as per vouchers	\$273 24

Respectfully submitted,

JEFFERSON C. ROWE, City Marshal.

Report of Chief Engineer.

To the Hon. Board of Mayor and Aldermen :

GENTLEMEN :—In compliance with the requirements of the City Ordinances, I herewith have the honor to submit to you the annual report of the condition of the Fire Department.

MEMBERSHIP.

The present membership of the department is 115, and I feel proud to say, that for efficiency and promptness to the call and execution of their duties they could hardly be excelled.

APPARATUS.

The apparatus consists of four steam fire engines (one on reserve,) one hook and ladder truck, one double tank (sixty gallons each,) Chemical engine, three hose wagons, two hose sleighs, one supply wagon, all in good condition. two second hand hose carriages. one hook and ladder truck which needs some repairs that will be done the coming year.

The hose wagons which are now in use by No. 2 and No. 3 companies, each of them weigh 1,950 pounds, which is too heavy for our use. I respectfully recommend that two lighter wagons, not to exceed 1,000 pounds each, be constituted in their places, as lighter wagons would be more beneficial for hydrant service to our department.

HOSE.

We have now in good condition 10,800 feet of 2 1-2 Cotton Jacket hose.

ENGINE HOUSES.

The engine houses are in good condition with some exceptions : the house on Hanover street requires to be painted the coming year, the house on Court street occupied by the Hook and Ladder Truck and Steamer No. 3 has been very much out of repair for a long time, and is not large enough for the accommodation of the two companies ; a new house has been recommended for several years past, to be built on the site of the present engine house and old court house. I respectfully call your attention to this matter.

The subject of a new engine house to be built at the west end has been laid before the City Government for several years past. I respectfully call your attention to this subject, and earnestly recommend that a modern engine house be built the coming year, to accommodate the Steamer Sagamore, a Hook and Ladder Truck and hose wagon. I understand the city has the refusal of a lot of land suitable for an engine house, a sketch of which is at the city rooms; by giving us this house at the west end, then we can reorganize the department by reducing the membership of the several companies and organizing a Steamer and Hook and Ladder companies in the new house.

WATER SUPPLY.

Our reservoirs are now connected with the new water mains, and with the addition of one hundred and fifty hydrants it seems to me our city has got as good a supply of water for fire purposes as can be found in any city of its size.

EXPENDITURES.

The expenditures made by the department during the past year amounted to \$11,572.54. The appropriation should be increased from last year on account of our hydrants to be looked after, and charges which are liable to occur during the year.

FIRE ALARM TELEGRAPH.

Since the adoption of this important branch of our department it has never failed to direct the firemen to the locality of the fire, although in my opinion there is a chance for a great improvement in this branch in order to make it more reliable. At present we have but one circuit; in case the wire should break, especially at night, our city would be without any alarm to locate the fire, as all the boxes would be cut out, whereas if we had the one circuit divided into three circuits, if the wire should break it would only cut out about eight or nine of the boxes.

I therefore would recommend that a four circuit repeater with three circuits be connected to our fire alarm, which will cost seven hundred dollars, not including the outside wire; this would render the alarm more certain and reliable. During the past year four new boxes (Nos. 5, 23, 25 and 63) have been added.

ANNUAL PARADE.

The seventh annual parade took place in September last, and with the hearty co-operation of the committee on fire department, and the grand zeal displayed by the members of the department it proved a great success, enjoyed alike by the firemen and the citizens; and I will venture to say that in no other

direction could the same amount of money be expended that would be more conducive to the better discipline and efficiency of the department.

During the year there have been 18 alarms, two of which were still alarms responded to by the Chemical. one was for a call for assistance outside of the city at Exeter, to which assistance was rendered. The total loss by fire in the city during the year, as near as could be estimated, amounted to \$1,672.49, which is a very small amount compared with previous years.

In conclusion, I would express my thanks to his Honor the Mayor, and to the members of the City Councils for their earnest efforts to promote the efficiency of the department; to the Police department for aid rendered; to the Board of Engineers and the officers and members of the several companies for the prompt and faithful manner in which they have performed their duties.

Respectfully submitted,

HERBERT A. MARDEN,

Chief Engineer.

Fire Alarm Telegraph.

Location of Boxes and Keys and General Instructions.

ALARMS.

All alarms will be sounded from the North church bell, the steam gong at Electric Light station, also the whistle at Eldredge's brewery, and repeated three times.

SCHOOL SIGNALS.

Two blows repeated three times at 8. a. m., no morning session; the same signal at 8.30 a. m., no morning session in the lowest four grades; the same signal at 11.30 a. m., or 1.30 p. m., no afternoon session.

NAVY YARD SIGNALS.

In case assistance is needed from the Navy Yard, six whistles will be blown from Electric Light Station, and repeated twice.

When assistance is needed on the Navy Yard, the signal by day will be two guns from the battery; by night two guns from the battery and two rockets. One gun being a signal for Kittery.

For assistance out of town, eight blows repeated twice.

LOCATION OF SIGNAL BOXES AND KEYS.

- Box 5.—Corner Dennett and Thornton streets. Keys at E. W. Caswell, 45 Dennett street, Wm. Hunter, corner Dennett and Thornton streets, Byron Dame, 48 Dennett street.
- Box 7.—Corner Dennett street and Maplewood avenue. Keys at Philip E. Woods, 39 Maplewood avenue, Daniel D. Waldron, 38 Maplewood avenue, Solomon Seymour, 6 Dennett street, John Milton's store.
- Box 9.—Corner Deer and Vaughan streets. Keys at B. & M. R. R. station, J. S. Treat's marble shop, Moses Laighton, 36 Vaughan street, R. H. Hall, 31 Vaughan street.

- Box 14.—Corner Market and Russell streets. Keys at Smith & Co.'s store, and Benning Moore's house, over above store, Concord R. R. wharf.
- Box 16.—Corner High and Hanover streets. Keys at 24 High street—corner Hanover, George W. Green, 15 High street, Pendexter's shop, 13 Hanover street.

- Box 53.—Kearsarge House, corner Congress and Chestnut streets. Keys at Kearsarge House, Jackson & Co.'s Express office, E. W. Cochrane's stable, H. R. Stoddard's stable.
- Box 58.—Police station. Key at station.
- Box 63.—Corner Miller avenue and Rockland street. Keys at Andrew P. Preston, corner Rockland street and Miller avenue, E. M. Jewett, corner Rockland street and Miller avenue.

Also, keys will be found in the hands of the engineers and the regular police.

DIRECTIONS.

Alarms are to be given from the box nearest the fire.

Open the box and pull the hook all the way down, once, and let go.

After giving the alarm, remain by the box, if possible, so as to direct the firemen to the exact locality of the fire.

Second alarm for same fire will be given only by one of the engineers.

Never open the box or touch the apparatus except in case of fire.

Never sound the alarm for a fire seen at a distance; be reasonably sure there is a fire before sounding the alarm.

Never let the key go out of your possession, except to some responsible person, to give an alarm of fire; and be sure the key is returned.

The key cannot be taken from the box except by an engineer.

If you remove from your house or place of business, return the key to any member of the board of engineers.

All citizens are requested to inform themselves where the keys to the boxes are kept.

The companies will respond to alarms of fire given from boxes according to orders given by the chief engineer.

When an alarm of fire is given, all the companies not responding will remain at their respective houses thirty minutes, unless dismissed by telegraph signal, which is as follows: Three blows signify that the fire is under control, and companies not in attendance will be dismissed.

Cambridge time will be struck each day at 12.30, from W. I. Trafton's jewelry store, except on Saturdays when one round on one box will be rung in. One stroke at any other time means nothing.

TESTING THE APPARATUS.

On the first of every month, all the apparatus will be tested and inspected, one round of the several boxes being rung in.

Per order

CHIEF ENGINEER.

City Solicitor's Report.

To the City Councils :

In making my annual report I can only submit a very few matters but that are familiar to you, by reason of my frequent communication to you, and your co-operation with me, for which it is only proper that I should extend to you my thanks.

The cases that I deem it proper to report at this time are as follows :

Storer Post, G. A. R. vs. City of Portsmouth is still before the Supreme Court, and will be decided at the March term.

J. W. Fisk vs. City of Portsmouth, will be disposed of at the January term of the Supreme Court next.

J. W. Marden & Son vs. City of Portsmouth, is an action to compel the city to execute a lease of Spring Market to the plaintiffs, upon an alleged agreement for the same, with some members of the committee on city lands and buildings in the summer of 1892. It will be tried at the January term of court next, and will probably be sent to the law term.

Abby Mulligans vs. City of Portsmouth, is an action brought to recover damages alleged to have accrued to the plaintiff by reason of personal injury, which she claims to have received by falling on the sidewalk upon Chestnut street, near the residence of Abby Pickering, on the evening of February 14, last. This is undoubtedly the last case of this character that will ever trouble the city, that will at least for some years to come, owing to a change in the law at the last session of the legislature ; therefore I should advise a settlement of this case if it can be done at a low figure. The case will be entered at the January term of court next, but will not probably be for trial until the April term.

Henry F. Clark vs. City of Portsmouth, will be entered at the January term of court, next, but will also not be for trial until the April term. This action is brought to recover expense which the plaintiff says he incurred as chairman of the late Board of Health. The plaintiff has never presented a bill of items to the city and it is hard to tell just what he intends to claim. The action is brought wholly out of spite, and has not even the color of good faith. I should advise that this can be contested.

August Hett vs. City of Portsmouth will be entered at the January term of court, next. This is an action wholly under the charge of the Board of Water Commissioners, and will not require your attention. Hon. Calvin Page, a member of the Board of Water Commissioners, has charge of the case in the interest of the city.

In compliance with your vote, instructing me to petition the Supreme Court for leave and consent to the discontinuance of the South Mill pond road, I have prepared a petition and shall present it to the court at the January term next. The result of this case cannot be anticipated at this time.

Upon your vote whereby I was authorized and directed to prosecute persons who had violated the sewer law and ordinances, I will say that after talking with several members of your government and other city officials, it was thought best to stay suit proceedings until the ground should be open in the spring and the sewer system established. By direction of the Mayor I have collected some of the outstanding bills for sewer entries.

Prosecutions in Police Court have not required much attention from me as they have generally been ably attended to by the City Marshal.

Respectfully submitted,

ERNEST L. GUPTILL,

Dec. 31, 1893.

City Solicitor.

REPORT

OF THE

Board of Water Commissioners.

To the City Councils of the City of Portsmouth :

As we have, in our report of last year, given full schedules of the water rates fixed by the Board for the use of water under the new system, and a list of the fire hydrants, and the main and distribution pipes, showing their size and length with their location, it is not necessary to give them in this report.

On account of additions to the plant, not at first contemplated, which have been found desirable in order to insure a sufficient supply of water at all times and carry on the works economically, we have been obliged to expend more than we expected. These additions have been the brick gallery or reservoir at Fountain Head, the intercepting gallery from Fountain Head running westerly through the Schurman field, and the track and trestle at the pumping station. But we are satisfied that these additions will more than pay for themselves in the end and are absolutely necessary, in order to make the works first class in every particular.

The whole city is now supplied by the pumping station at Sherburne Spring, the water from all the springs and wells belonging to the system coming direct to this station, and all the coal used can be carried there by cars from the wharf.

We called your attention in our last report, to the fact that you have made no arrangement, with us, regarding the use of the fire hydrants and the payment to the water department of an annual rental for each hydrant, as is done in other cities. We believe that the hydrants have demonstrated their value in case of fire, and we would suggest, as we did last year, that you appoint a committee of your bodies to confer with us in relation to this matter if you think it best to do so.

The total indebtedness for the water works is \$315,000, all bearing interest at the rate of four per cent.

Receipts and Expenses of Portsmouth Water Works

For the Year Ending December 31, 1893.

Receipts.

Balance on hand from last year	\$17,510 59

Report of the Superintendent of Schools.

To the Board of Instruction, Portsmouth, N. H.

GENTLEMEN:—I have the honor to present my second annual report as Superintendent of the schools of Portsmouth. This report is the eighth in the series of annual reports from this office.

The year has been marked by no very radical changes in the management, purpose and plan of the school organization, but has been characterized none the less by good, steady, persevering work on lines already laid down.

The burden laid upon public education has increased many fold in the last few years, not so much in the extra demand for a better intellectual discipline as in the development of the heart and conscience. The home and parents seem appointed by nature as the proper educators in this direction, but if the organization of modern society demands that the responsibility for this most important function be shifted, we may regret the conditions but must accept the charge.

The number of new pupils admitted during the year has been smaller than during any year since 1888. Two reasons may be given to account for this. During the present period of business depression the number of new families that come to the city is materially decreased by the lack of employment. Again the fear that the few cases of diphtheria that appeared last summer would develop into an epidemic operated strongly to prevent many parents from sending their children, especially those of tender years, to the public schools. As an offset to this diminution, and as a probable result of this same business depression, we find that the number of withdrawals from the higher grades is much smaller than usual, so that while the number of pupils in the schools as a whole remains substantially the same, the ever present problem of overcrowding has met us in the higher rather than the primary grades.

New pupils admitted	1893,	-	-	-	-	166
“ “ “	1892,	-	-	-	-	211
“ “ “	1891,	-	-	-	-	252
“ “ “	1890,	-	-	-	-	281
“ “ “	1889,	-	-	-	-	224
“ “ “	1888,	-	-	-	-	160

The number of tardinesses surely is larger year by year than it should be. The responsibility for this rests alike on teacher and parent and only by earnest co-operation can the matter be remedied. This matter of prompt and regular attendance is urged, not alone for its benefit toward the convenience of the school but for the effect on the pupil himself. If there is one trait more than another that conduces to make life a pleasure, not only to its possessor, but to the world at large, it is punctuality. Add that this virtue is easily the result of habit and that habit is generally the fruit of early training, and the case is plain.

The record of tardinesses and dismissals for the several past years is here given :

Year.							Number of Tardinesses.	Number of Dismissals.
1893,	-	-	-	-	-	-	1,357	1,123
1892,	-	-	-	-	-	-	1,363	1,109
1891,	-	-	-	-	-	-	1,153	1,248
1890,	-	-	-	-	-	-	1,510	1,331
1889,	-	-	-	-	-	-	2,014	1,645
1888,	-	-	-	-	-	-	3,745	2,134
1887,	-	-	-	-	-	-	4,821	1,638
1886,	-	-	-	-	-	-	5,495	1,742
1885,	-	-	-	-	-	-	8,044	2,012
1884,	-	-	-	-	-	-	7,593	2,285
1883,	-	-	-	-	-	-	7,010	1,954
1882,	-	-	-	-	-	-	8,523	2,678

[The above figures do not include the High School record]

The number of cases of corporal punishment I am glad to say, has reached a number smaller than ever before. That the discipline and general tone of the schools has in the least deteriorated by this sweeping reduction of nearly one-half there is no one ready to assert. From a close study of the reports on file I am sure that in several instances some other means would have better produced the desired end.

We can hardly expect human nature to become perfect, but I confidently look forward to still further progress in this direction another year. The teachers have made commendable efforts, and I am sure that every punishment has been made only after the exercise of their best judgment. Of the thirty-five cases eight are from the first district, thirteen from the second, and fourteen from the third. Three were punished twice, leaving thirty-two different offenders, of whom six were girls and twenty-six boys. The number of punishments for the several past years is given :

1893,	-	-	-	-	-	-	-	35	punishments.
1892,	-	-	-	-	-	-	-	68	"
1891,	-	-	-	-	-	-	-	51	"
1890,	-	-	-	-	-	-	-	60	"
1889,	-	-	-	-	-	-	-	62	"
1888,	-	-	-	-	-	-	-	97	"
1887,	-	-	-	-	-	-	-	270	"
1886,	-	-	-	-	-	-	-	654	"

Teachers.

Our corps of teachers remains substantially the same as last year. While this matter of few changes needs the light of other circumstances to determine whether it is a blessing or an evil, I think we ascribe our immunity from changes to our good fortune. Our teaching force on the whole is earnest, progressive, and full of an honest purpose.

Pleased, as is natural and proper, with their success in different lines of work, they are at the same time generally keen to detect their own failures and are filled with that noble dissatisfaction that surely leads to improvement.

There is one thing lacking among our teachers, the more noticeable from its extreme desirability—the esprit de corps and general community of interest that should bind us all into a homogeneous whole. The teachers from one school too often regard the teachers from another in exactly the same spirit and feeling that they would teachers from another city. Again under the same roof there is jealousy and lack of appreciation and kinship, one with another, till in at least two cases criticism from sources outside the schools has been awakened.

Now, surely, if we are to make any success in this intricate and puzzling problem of education, we must all pull together. The idea still lingers a bit with us that there are teachers of subjects or teachers of grades, and that if the subject or the grade receive its due attention the measure of responsibility is filled. I hope and trust that the time may not be far distant when all our teachers will realize in practice as most of them already do in theory, that this web of many threads which we call education cannot be divided into any definite number of organic wholes, that the mutual inter-dependence of its parts requires the teacher who aims at success, whether in the High or Primary school, to be in sympathetic touch with the whole, requires extra exertion to acquire a feeling for those parts that do not come within the range of personal experience.

The resignations for the past year have been as follows :

Annie E. Pavey,	Drawing,	April 15.
Sarah R. Beane,	Haven,	June 22.
Katherine L. Haven,	High,	June 22.

Ida C. S. Wing,	Farragut,	June 22.
Grace F. Leavitt,	Whipple,	June 22.
Alice H. Connor,	Farragut,	Dec. 1.

TEMPORARY TEACHERS.

E. Ella McDonough, Haven, Feb. 13 to June 22.
 Alice H. Conner, Farragut, March 1 to June 22.

LEAVE OF ABSENCE.

Sarah R. Beane, Haven, Feb. 13 to June 22.
 Mary E. Prescott, Whipple, Oct. 1 to Nov. 1.

APPOINTMENTS.

Hannah A. Hutton,	Drawing,	July 5.
E. Ella McDonough,	Whipple,	July 5.
Alice H. Conner,	Farragut,	July 5.
A. Gertrude Wheaton,	Haven,	Sept. 6.
Myra Sweetser,	Farragut,	Dec. 1.

Training School.

The Portsmouth Training School was established by vote of the Board of Instruction to begin in September 1887. Though only in the sixth year of its existence the school has had three principals, and has been located in three different buildings. Eleven of its graduates are at present employed in our own schools, while eight others who have been enrolled as teachers have, for various reasons, resigned. Graduates of the school find ready employment in the neighboring towns, and at the present time there is no graduate an applicant for a school, while of the class to graduate in February next two have already been elected to positions. When we consider that but for our training school, a large proportion of our new teachers must necessarily be without special training we can measure its worth to the city.

One word, too, may not be out of place in regard to its cost. It is sometimes urged that we cannot afford the expense. Now in point of fact we actually save money by having the school. The children in the four grades of the school would require the services of at least three teachers, which by our present schedule would cost \$1,350. We are paying to the principal and pupil teachers in the school \$1,200 per year. That the institution is very costly would, I think, be difficult to maintain.

The professional training of teachers has always been along one of two plans. The different Normal Schools of the various states may stand for one type and the city training schools for the other; the one class has been marked by much theory

with little practice, the other by abundant opportunity for practice with whatever theory might be gathered by the way.

Of either plan followed exclusively, the latter would undoubtedly give the better results, but the true plan, or at any rate the one at present most approved, is a combination of the two. Normal schools are seeking constantly to enlarge their practice and model departments, and the training schools are adding to their normal instruction. At the present time we aim to give in addition to the practice in teaching, courses in Psychology, History of Education, Pedagogy and Methods, with School Law and Management.

As a measure of protection to the children in the school as well as in regard to the best interests of the pupil teachers, it has been decided to allow those in whose way to becoming successful teachers there seems marked impediment to withdraw from the school at the end of the first half year.

Following is a list of the graduates of the school with their present positions :

<i>Name.</i>	<i>Year of Graduation.</i>	<i>Schools Taught in Portsmouth.</i>	<i>Present Position.</i>
Eleanore O Wiggin	1888....	(Peabody, Haven, Whipple.....	Not teaching.
Maria Odiorne.....	1888....	Haven.....	Not teaching.

A Gertrude Wheaton.....	1893....	Haven.....	Portsmouth.

Training School Regulations.

SECTION 1. Persons desiring to enter the Training School as pupil teachers shall make written application to the Board of Instruction for admission thereto, stating where they were educated and what experience, if any, they have had in teaching. The applications shall be referred to the committee on the Training School, who shall have the power to admit the applicants to the school.

SEC. 2. Candidates for admission must have completed the course in the Portsmouth High School, or an equivalent course

and may be required to furnish references as to character and scholarship. Pupil teachers may be admitted on the first of February or at the beginning of the fall term in each year.

SEC. 3. The number of pupil teachers constituting the training class shall be determined from time to time by the committee on the school.

SEC. 4. The course of instruction in the training department shall continue for three periods of five school months each. The first of these periods shall be regarded as probationary and at its expiration leave to withdraw will be granted to those candidates whose success is not probable. A certificate shall be granted to those who complete the course.

SEC. 5. Any member of the training class who shall be elected teacher in any school of the city before completing the course of study shall, upon recommendation of the principal of the school and the superintendent, be entitled to a certificate.

SEC. 6. Pupils in the training class may be assigned by the superintendent, at his discretion, to serve as substitutes for other teachers.

SEC. 7. The course of study in the training class shall be prescribed by the superintendent and the principal of the school.

SEC. 8. Pupil teachers shall serve without compensation during the first term. They shall be paid at the rate of \$10 per month during the second term and at the rate of \$15 per month during the third term.

School Accommodations.

At the opening of the spring term it was found that the first grade schools in both the Whipple and Haven districts were crowded to such an extent that measures of relief must be at once adopted. It was at first proposed to open a primary school in the Peabody building, then unused for school purposes, but a census revealed the fact that all but an insignificant number of first grade children at the Whipple School came from that portion of the city lying to the westward of the school. Some attention was then devoted to the Cabot street school-house, but an examination showed that the necessary repairs would involve too long a delay, so it was decided as a last resort to transfer the fifth grade from the Whipple to the Peabody, open two first grade rooms in the former and relieve the Haven by means of these. This arrangement continued in force till the fall term, when the diminution of the children in the first grade made it possible, at the expense of overcrowding the third and ninth grades, to again place the fifth grade in the Whipple and close the Peabody.

It happened to our advantage that the number of first grade children entering in the fall was over forty smaller than the average for the past three years. If, as is probable, this reduction was caused by the fear of diphtheria, the same situation will confront us at the opening of the spring term of the coming year. I consider it of the highest importance in the organization of our school system that we use every effort to avoid the crowding of our primary schools. We intend to hold our primary teachers to the highest standard of primary instruction, but this can be attained only by limiting the number of children under the charge of each teacher.

The matter of establishing a kindergarten was referred at the June meeting of the Board, to a special committee, but from financial considerations it was deemed best to postpone the subject till another year. Action should surely be taken then. On the subject of kindergartens Portsmouth is already behind other cities, behind her own record in educational matters. We owe it to the good name of our schools not to let this subject lie dormant longer.

During the summer the sanitary arrangements at the Haven School were completely changed and brought into accord with the demands of modern civilization. It is hoped that the remainder of the long needed repairs may be deferred no longer than the present summer.

The Report of the Committee of Ten.

The most important educational publication of the year and the one most anticipated has been the report of this committee appointed by the National Educational Association, together with the reports of the nine conferences organized under the instructions of the committee. This document, published by the United States Bureau of Education, gives us the opinion of one hundred of the most prominent educators in the country, presided over by the President of Harvard University and including representative men from both schools and colleges in all parts of the country. Although the report was intended to deal primarily with the studies of the secondary or high schools, it became necessary in most instances to review the program of the elementary schools and to propose suggestions that seemed likely to increase their efficiency. I propose to present you a few from the most striking of their recommendations, with brief comment and comparison with the state of our own course of study.

The conference on Mathematics recommends as follows :

"That the course in arithmetic be at the same time abridged and enriched; abridged by omitting entirely those subjects which perplex and exhaust the pupil without affording any really valuable discipline; and enriched by a greater number of exercises in simple calculation and in the solution of concrete problems.

Among the subjects which should be curtailed, or entirely omitted, are compound proportion, cube root, abstract mensuration, obsolete denominate quantities, and the greater part of commercial arithmetic. In such subjects as profit and loss, bank discount, and simple and compound interest, examples not easily made intelligible to the pupil should be omitted. The conference at the same time insists upon the importance of practice in quick and accurate reckoning. The scholar should be thoroughly trained in performing correctly and rapidly the four fundamental operations with integers, vulgar fractions and decimals."

Our own course of arithmetic has for a number of years been stripped of all that the conference deems unadvisable and the results are so satisfactory that the correctness of their conclusions seems unassailed. We go further and omit one subject that they include, the metric system, and here it seems to me they fail to make their case. The same arguments adduced to exclude the higher commercial arithmetic and unused denominate numbers put also the metric system without the pale. It is not practically employed till the pupil begins the study of experimental physics, then under the spur of an actual necessity it can be learned in a few days and learned in a vital connection. Here seems to be its proper co-relation from an economic standpoint. During the past year we have introduced concrete geometry into the last three years of the grammar course, allotting to it one hour per week. This seems in exact accord with the recommendations of the conference. The work promises well and with due attention will soon become firmly established.

The Conference on Physics and Chemistry made the following recommendations:

1. "That the study of simple, natural phenomena be introduced into the elementary schools, and that this study, so far as practicable, be pursued by means of experiments carried on by the pupil; also that in connection therewith, in the upper grades of these schools, practice be given in the use of simple instruments for making physical measurements.
2. That, whenever this is possible, special science teachers or superintendents be appointed to instruct the teachers of the elementary schools in methods of teaching natural phenomena."

The Conference on Natural History adopted, among others, the following resolutions:

"That the study of natural history (botany and zoology) should begin in the primary schools at the beginning of the school course.

That no less than one hour per week, divided into at least two periods, should be devoted, throughout the whole course below the High school, to the study of plants and animals; that in this study no text book should be used, and that these observation lessons should, as far as possible, be made the basis of, or correlated with, work in drawing, language and literature

That the study of Natural History in both the elementary school and the High school, should be by direct observational study with the

specimens in the hands of each pupil, and that in the work below the High school no text book be used."

The establishment of this work has been a matter involving with us considerable time and attention. It is comparatively easy to plan school courses on paper, but their fruitful realization is altogether another thing, and haste must be made slowly and theories fitted to conditions by actual experiment. The immediate difficulty with the success of the subject of science in the lower grades, is the fact that a majority of teachers have received no training in these studies and are consequently not prepared to take them up off-hand. To aid in overcoming this condition, special outlines of small portions of the subjects chosen have been prepared and distributed, books of reference furnished, teachers' meetings held, and assistance furnished in any way that seemed likely to help. Our plan has been to attempt but little and master that. In the grammar grades for the present winter we chose some easy physical experiments to be made illustrative and performed as a rule by the teacher, the pupil contributing as far as possible. It was made for the present year optional with the teachers to introduce this work, but nearly all have done so with general results fully meeting my expectations. The teachers of the grammar schools deserve hearty praise for the spirit and thoughtfulness with which they have met this new work.

I wish I might report that the teachers in the primary schools were as fully awake to the responsibility in this line resting upon them. The only work here attempted, outside one instance, has been in botany. A few have done well, but the majority, in marked contrast to their general attitude, seem to be waiting the evil day when the introduction of the science work can be no longer postponed.

This innovation has long since passed the experimental stage; it has come to stay, and the teacher who wishes to keep in touch with the best educational thought of the time needs to be getting in line.

The movement is the natural outcome of this present civilization.

To be in proper adjustment to his environment, the individual needs to have keen understanding of ten thousand scientific facts that fifty years ago were unknown or the exclusive property of the savants.

The schools must reflect and exemplify present not past conditions.

In conclusion, allow me to express my appreciation of your uniform and extended kindness.

Respectfully submitted,

J. C. SIMPSON.

Portsmouth, Dec. 31, 1893.

Supt. of Schools.

High School Report.

To the High School Committee, Portsmouth, N. H.

GENTLEMEN :—The following are the statistics of the school for the year 1892-03.

Whole number enrolled,	162
Average number belonging,	142
Average daily attendance,	136
Per cent. of attendance,	96
Number not absent,	21
Instances of tardiness,	213
Whole number enrolled Sept. 93,	179

The condition of the school on the whole seems satisfactory and the year closed notes a marked improvement in the already creditable tone of the school. The school is making an enviable record in preparing for college entrance examinations. Parents who are thinking of sending their children away to be fitted would do well to examine the standing of the graduates of our own school in the entrance examinations and rank lists of the various colleges. The substitution of the four years for the three years English course has been accomplished with but little friction. The coming graduation is the last from the three years course. As the arrangement of courses stands at present, it is intended that the value of the diplomas shall be equal, that the amount of attention given, and the amount of training received shall be in one course exactly the same as in the others.

During the year a valuable piano has replaced the one worn out by long use, and a considerable sum spent in an increase of the physical and chemical apparatus made necessary by the erection of the new laboratory.

The school is at present working up to the capacity of its teaching force, and if the entering class another fall should prove as large as the last an increase would become imperative.

I call your attention to a report from the Principal of the school, herewith presented.

Mr. J. C. Simpson, Supt. of Schools :

DEAR SIR :—No very marked changes have occurred in the work of the High School during the past year. The revised course of study has been put into operation quite generally, and the results seem to be satisfactory.

The class which graduated last June was a particularly large one for the school, and of the number, five have entered college as follows : two at Harvard, two at Dartmouth and one at Wellesley. One member of the next lower class passed the Harvard preliminaries at the same time.

At the opening of the school year in September we were confronted with an unusually large entering class, and because of existing circumstances were compelled to arrange the work in a manner somewhat prejudicial to the best interests of the class. These conditions still exist, while better results could be attained if they were removed.

It has been thought by some that an undue amount of time was given to the college preparatory work, to the detriment of the large majority of pupils. It will be seen by reference to the recitation card that 14 out of 125 recitations per week are devoted to work strictly college preparatory, and the number of pupils in that course is in practically the same proportion. The benefits resulting from this work extend beyond those who are receiving the immediate attention, and therefore I believe it would be a great misfortune to curtail this branch of work in any way.

Allusion has been made in these reports to the apparent lack of an intelligent interest in the school on the part of parents and others ; while there has been an improvement in this respect during the past year, yet there is much to be desired along this line.

Notice has been received that the exhibit which the school sent to the World's Columbian Exposition, has been given an official award.

During the year we have received as gifts from the class of '93, a plaster bust of Columbus, and a photograph of St. Peter's at Rome.

Very respectfully,

Dec. 31, 1893.

IRVING H. UPTON.

Le Roman d'un Jeune Homme Pauvre. Sight reading, Andromaque.

English Literature and Composition.

FIRST YEAR. (4 times a week.)

Bryant, Goldsmith, Gray, Lamb.

Chittenden's English Composition.

SECOND YEAR. (3 times a week.)

Lowell, Burns, Dickens, Bacon, Emerson.

Lockwood's Lessons in English.

THIRD YEAR. (3 times a week.)

Tennyson, Browning, Shakespear, Addison, Carlyle.

Lockwood's Lessons in English, Themes.

FOURTH YEAR. (3 times a week.)

Chaucer, Spencer, Milton, Shakespear, Macauley.

Rhetoric, Themes.

NOTES.—The successful completion of the English Course will prepare pupils for entrance to Scientific Schools, and the Classical Course meets the requirements of the various colleges, but it should be borne in mind that very few pupils can complete the requirements for admission to Harvard College in less than five years.

No pupil is entitled to promotion or graduation if he has not attained a general average of 70 per cent., and an average in each study of 55 per cent.

Parents who desire further information regarding choice of studies, are requested to confer with the master before or at the beginning of the school year.

The class of 1893 numbered thirty-three, eight in the Classical, thirteen in the Latin, and twelve in the English course.

The exercises of graduation were held in Music Hall, Friday, June twenty-third. The address was given by William A. Mowry, Ph. D.

The following were the graduates :—

CLASSICAL COURSE.

Florence Josephine Duntley,
 Bertha Frances Martin,
 Hattie Oxford,
 Florence Estelle deRochemont,
 Helen Knight Smith,
 Charles Hull Batchelder,
 Horace Gibson Pender,
 Walter Herman Sides.

LATIN COURSE.

Annie Burroughs Ayers,
 Elinore Blake,
 Edith Gilman Brewster,
 Alice Maud Chase,
 Mary Theresa Conlon,
 Ella Ducker,
 Ethel Gertrude Gray,
 Annie Louise McDonough,
 Abbie Alice Rollins,
 Virginia Sanborn.
 Maud Violet Simpson,
 Mary Mehitable Tucker,
 Frederick Henry Clark.

ENGLISH COURSE.

Katherine Wentworth Ayers,
 Mabel Agnes Dennett,
 Nettie Addie Eldredge,
 Mary Lizzie Garland,
 Emma Malora Lincoln,
 James Conlon,
 Charles William Hannaford,
 Clarence Ellsworth Hodgdon,
 George Robert Newick,
 William Nelson Noyes.
 James Horace Peverly,
 Herbert Clifford Ross.

Requirements for Admission.

The requirements for admission to the school are a certificate of promotion from one of the public grammar schools, or the successful passing of an examination. This examination will be held some time in June, 1894, the time to be advertised.

Candidates must offer the following subjects:—

Aritlmetic,
Algebra to Simultaneous Equations,
Book-keeping, by single entry,
History of the United States,
Physiology,
Geography, including Physical,
English Language,
Writing.

The examination in English will include grammar, spelling, and the reading of standard English literature. Candidates for 1894 will offer *Lady of the Lake* and *Ivanhoe*, Irving's *Sketch Book*, Longfellow's *Evangeline*, Whittier's *Snow-Bound*. An acquaintance with drawing and music as conducted in the grammar schools is recommended, in order that these studies may be successfully prosecuted in course.

Respectfully submitted,

J. C. SIMPSON,

Portsmouth, Dec. 31, 1893.

Superintendent.

Report of the Director of Music.

To Mr. J. C. Simpson, Supt. of Schools:—

The condition of our schools in music is along the line of advancement, both in quality, and work accomplished.

The same principle has been followed the present year as formerly, and with better results than ever before.

The introduction of the bass clef one year earlier than formerly is an improvement, by getting the boys familiar with work better fitting them for the higher readers to be used in the upper Grammar schools. It gives them a new study and they gain a larger, broader knowledge of music away from the readers.

The teachers have followed out the plan in a way truly gratifying to all, and especially so in the training school has very good work been accomplished by the young ladies who have been pupils in our schools, and have had a chance to see some of the ways used to develop the child's mind in music. I have advanced some new things in the matter of keys to be used, having in view each individual class, and have been supported fully by all the teachers.

We have held to the note reading plan, believing it to be the best way to gain independence in thought, and to do new work at sight.

In the lower grades more dictation, both in sounds and tune has been given, before any representation is shown.

A short dictation helps fix the various sounds in the mind, then the note is shown representing the sound already given, and small children soon learn to read notes, as the effect is the same in all keys.

More visits from school officers and parents would be helpful I am sure, and I earnestly desire it. Come in and see what we are endeavoring to accomplish, and you will be very welcome with any good suggestions you may have, to help us in this pleasant work.

Sympathy is needed in the work of singing; we must have it to gain the best results. How can we better do it than by showing by our presence our interest in the work.

I should be pleased to show to any one the principle used in our schools in music either in the class or out.

A growing interest is manifest from the fact of several having been engaged to assist in choirs and other organizations in the city, and I hear nothing but the best reports from all.

We shall endeavor to do our best in the future as we have in the past, and with your full support can look with pleasure on the music in the schools in Portsmouth.

Thanking you and all for the courtesies extended to me thus far, I remain

Very truly yours,

GEO. D. WHITTIER,

Director.

Report of the Teacher of Sewing.

To Mr. J. C. Simpson, Supt. of Schools:—

The course of sewing in the schools begins in the fourth grade and extends through the fifth and sixth grades. In the first place the pupils are taught to baste their work, then to oversew, hem, stitch, etc., finishing with learning to make buttonholes. The pupils are expected to bring their work from home, as they naturally feel more interest in making articles which they afterward possess. No fancy work is allowed, it being thought better to confine the teaching to useful things, such as pillow slips, napkins, aprons, underclothing, etc. One hour a week is the time allotted to each class, and during that hour, the work of each pupil is brought several times under the personal supervision of the teacher. The progress of the pupils in this branch has been shown several times within a few years, in the public exhibitions. It is believed that by this method many children, all over the city, get a knowledge of sewing and of putting articles of clothing together which they would not get in any other way.

HARRIET M. REMICK,

Teacher of Sewing.

APPENDIX D.

Roll of Perfect Attendance for 1892—93.

HIGH SCHOOL.

Katherine W. Ayers,	Sadie K. Dixon,
Alice M. Chase,	Mary L. Garland,
Hattie Oxford,	Virginia Sauborn,
Pearl A. Seavey,	Charles H. Batchelder,
Ira A. Coleman,	William N. Noyes,
Joseph W. Hobbs,	George F. Parker,
Horace G. Pender,	James H. Peverly,
Hazen P. Philbrick,	Howard E. Oxford,
Ralph Sanborn,	Byron F. Staples,
John S. Tilton,	Daniel B. Trefethen.

FARRAGUT SCHOOL.

Leslie Davis,	Fred Furber,
Bertha M. Quinn.	

WHIPPLE SCHOOL.

Marion Taylor,	John Redden,
Augustus Trneman,	Eva Sanborn,
Annie W. Philbrook,	Brandt W. Wilson.

FRANKLIN SCHOOL.

Ralph A. Littlefield,	Annie A. Blake.
-----------------------	-----------------

WOODBURY SCHOOL.

Fred W. Patterson.

HAVEN SCHOOL.

Minnie Woods,	Lora I. Grover,
	Flora Folsom.

OMITTED IN 1891—92.

Cora E. Carleton,	Herman J. Chandler,
Mabel A. Churchill,	Fred F. Lowd.

OUTLINE OF WORK, 1894—95.

Language.

FIRST YEAR. FIRST HALF.

Conversational exercises—[Miss Badlam's Suggestive Lessons, pp. 7-32.]

Read from blackboard, [script;] from Appleton's and Butler's charts, and two primers, (first half.)

Copy words and sentences from reading lessons.

Phonic drill daily.

Use as guide Miss Badlam's Suggestive Lessons in Reading.

SECOND HALF.

Read six or more Primers and several First Readers.

Memory gems from Nursery Classics and other sources.

Dictation.

Capitals, periods, question marks.

Write simple letters.

Story telling and reproduction, [Suggestive Lessons, p. 40.]

Phonics daily.

SECOND YEAR. FIRST HALF.

Drill book--Franklin Second Reader. Read five or six First Readers, and two or more Second Readers at sight. Silent Reading.

Memory gems.

Spelling—[written,] words from all lessons.

Names of letters *in the order* of the alphabet.

Phonics.

Capitals, punctuation marks.

Letter Writing.

Stories from pictures, oral and written.

SECOND HALF.

Drill book—Franklin Second Reader. Read several Second Readers at sight. Silent reading.

Continue in other lines the work of first half year.

THIRD YEAR.

Drill book. Franklin Third Reader. Read several Second and Third Readers at sight. Silent reading.

Memory gems.

Spelling, oral and written, from all lessons.

Phonics daily.

Miss Hyde's Practical Lessons in Use of English, Book I, Part I, also Suggestive Lessons, Appendix.

Written stories and reproductions. Scudder's Fables and Folk Stories. Andersen's Fairy Tales.

FOURTH YEAR.

Drill book—Franklin Third Reader. Sight and silent reading.

Supplementary reading—Æsop's Fables, Hawthorne's Biographical Stories, Miss Andrews' Seven Little Sisters, Each and All, Stories of Child Life, King's Home and School.

Spelling as before.

Phonics.

Use Practical Lessons, Book I, Part II.

FIFTH YEAR.

Reading—Franklin Fourth Reader. Hawthorn's Wonder Book, De Foe's Robinson Crusoe, Longfellow's Shorter Poems, [Leafflets.] Stories from American History. Eggleston's Primary History of U. S. Seaside and Wayside, No. 3. Miss Hall's Our World. Much silent reading.

Phonics daily.

Memory's gems. Metcalf's Language Exercises, Part I.

Spelling from all lessons, oral and written.

SIXTH YEAR.

Reading—Franklin Fourth Reader. Sight and *silent* reading daily. Hawthorne's Grandfather's Chair. Kingsley's Water Babies. Burroughs' Birds and Bees. Longfellow's Shorter Poems and Hiawatha, Higginson's Young Folks' History of U. S.

Phonics daily.

Spelling from all lessons, oral and written.

Declamation once a month.

Metcalf's Language Exercises, Parts II and III.

SEVENTH YEAR.

Reading—Franklin Fifth Reader. Hawthorne's Twice Told Tales, etc. Franklin's Autobiography, Whittier's Snow Bound, Among the Hills, and Tent on the Beach. Kingsley's Greek Heroes.

Spelling as before.

Declamation once a month.

Grammar—Teach to recognize the parts of speech.

Practical Lessons in Use of English, Book II. Our Language, Part I.

EIGHTH YEAR.

Reading—Franklin Fifth Reader. Irving's Sketch Book. Longfellow's Evangeline and Miles Standish, Church's Stories of the Old World. Spelling, oral and written.

Phonics daily.

Declamation once a month.

Essays twice each term. Four abstracts of books read at home.

Grammar—Elements of sentence; parts of speech; plural and case forms; pronouns; adjectives.

NINTH YEAR.

Read Scott's Ivanhoe and Lady of the Lake. Life of Scott. Spelling, both oral and written.

Phonics daily.

Declamation once a month.

Composition, as for eighth year.

Grammar—Analysis; verbs.

Mathematics.

FIRST YEAR. FIRST HALF.

Numbers to 5, objectively, [without figures.] Use Wentworth and Reed as a guide.

SECOND HALF.

Numbers to 10, objectively; teach figures; counting objects to 50; use Wentworth and Reed, also Numbers Illustrated. Roman Numerals to XII—Teach time by the clock.

SECOND YEAR.

Numbers to 20. Signs of addition, subtraction, multiplication and division. Halves, fourths, thirds and sixths. Pint, quart, gallon. U. S. Money. Pound, ounce, peck, bushel, Building tables. Time by the clock. Roman Notation to XX.

THIRD YEAR. FIRST HALF.

Add, subtract, multiply and divide by 100. Numeration and Notation to 1000. Yard, foot, inch. Teach fifths and eighths. U. S. Money. Give much mental work. [First Lessons in Numbers.]

SECOND HALF.

Add, subtract, multiply and divide (divisors to 12) to 1000. Roman Notation to M. U. S. Money. Mental work.

FOURTH YEAR.

Fundamental processes to 1,000,000. Tenths and hundredths. Teach the principal weights and measures. Mental Arithmetic.

Addition and subtraction of small fractions, objectively. U. S. Money. Bills. (Brief Course Arithmetic.)

FIFTH YEAR.

Addition, Subtraction, Multiplication and Division, thoroughly reviewed. Common weights and measures. Simple fractions to twelfths and thousandths (all the processes.) Weights and measures. U. S. money. Bills. Mental work. (Brief Course Arithmetic.)

SIXTH YEAR.

Common and decimal fractions (*simultaneously*.) Bills. Factors and Multiples.

Weights and measures completed [Measurements pp. 121-166, omitting Metric System.]

SEVENTH YEAR.

Compound Numbers. Practical work in long, square and cubic measures, and in avoirdupois weight.

Percentage [with and without the elements of time.] Method of Interest, page 187. [Complete Arithmetic.]

Geometrical Problems.

EIGHTH YEAR.

Review the work of previous years. Ratio and Proportion. Square Root.

Geometrical Problems.

NINTH YEAR.

Book-keeping. Algebra.

Review Arithmetic. Principles, definitions.

Geometrical Problems.

Geography.

THIRD YEAR. FIRST HALF.

Home Geography. School surroundings; direction; points of the compass; forms of land and water. [Use moulding table.]

SECOND HALF.

Climate. Soils. Productions. Grand divisions of land and water. Teach meaning of maps and globes.

FOURTH YEAR. FIRST HALF.

Review work of third year. People, including government, religion, etc. Geography of Portsmouth, New Hampshire. United States in general and special study of New England. Use maps and globes. Read Miss Andrews' Seven Little Sisters, and Each and All. King's Home and School.

SECOND HALF.

The rest of North America. South America.

FIFTH YEAR. FIRST HALF.

Primary Geography as a text book. Review N. and S. America by topics. Europe. Map drawing by tracing. Geographical Readers. Miss Hall's Our World.

SECOND HALF.

Asia. Africa. Australia by topics. Maps. Geographical Readers.

SIXTH YEAR. FIRST HALF.

Grammar School Geography. United States and the rest of North America. Special study of N. H. and New England. Map drawing.

SECOND HALF.

South America. Great Britain. Use Geographical Readers. Map drawing.

SEVENTH YEAR. FIRST HALF.

Europe. Asia. *Map drawing.*

SECOND HALF.

Africa. Australia and Pacific Islands. New Hampshire and New England. *Map drawing.*

EIGHTH YEAR.

Mathematical Geography. Topics in Physical Geography. Review.

NINTH YEAR.

Physical Geography.

History.**FIFTH YEAR.**

Stories of local history. Story of Our Country, as supplementary reading.

SIXTH YEAR.

Read Grandfather's Chair. Local history. Stories from English and American History. Read Higginson's or Montgomery's Beginner's History of United States.

SEVENTH YEAR.

Read Dickens' Child's History of England. Discuss events that had a particular bearing on our own history.

EIGHTH YEAR.

American History by topics to 1789.

NINTH YEAR.

American History since 1789. Constitution U. S. State and city government. Read Miss Dawes' *How We are Governed*.

Physiology and Hygiene.—Primary.

[Topics of first four years from those prepared by Dr. Duntou, of the Boston Normal School.]

SECOND YEAR.

I.—*Parts of Body*. 1. Head, neck, body or trunk. 2. Arms, right, left. 3. Legs, right, left. 4. Limbs. 5. Position of the body compared with that of common animals. 6. Arms, wings and fore legs.

II.—*Parts of the Head*. 1. Crown, back and side. 2. Hair, combing and brushing. 3. Face, complexion, and washing the face. 4. Ears, right and left.

III.—*Parts of the Face*. 1. Forehead, temples, cheeks, chin, lips. 2. Eyes, eyebrows, eyelashes, eyelids. 3. Nose, nostrils, bridge of nose. 4. Mouth, teeth, tongue; cleaning the teeth.

IV.—*Neck*. 1. Throat and back of neck. Protection and cleanliness.

V.—*Parts of the Body*. 1. Back, chest, stomach. 2. Shoulders, sides, hips.

VI.—*Arms*. 1. Movements. 2. Joints, shoulders, elbows and wrists. 3. Upper arm, forearm, wrist.

VII.—*Hand*. 1. Back, palm, thumb and fingers. 2. Joints, fists, knuckles. 3. Forefinger, middle, ring and little fingers,

thumb. 4. Motions, strength and use. 5. Nails and their uses. 6. Cleanliness : paring and biting.

VIII.—*Legs*. 1. Motions, proper walking, hip, knee and ankle joints. 2. Thigh, shin, calf, foot.

IX.—*Feet*. 1. Sole, instep, heel, ball, arch. 2. Tight and short shoes, cold and damp feet. 3. Cleanliness of feet ; neat shoes and stockings.

THIRD YEAR.

X.—*Eye and Sight*. 1. Color of the eyes. 2. White of eye, iris, pupil. 3. Change in pupil for light. 4. Bony socket and eyeball. 5. Eyelids, lashes, brows, winking and tears. 6. Too little and too much light ; reading at twilight. 7. Holding work too near, looking cross-eyed, and cleanliness.

XI.—*Ear and Hearing*. 1. Sounds known by the ear ; transmitted by the air and by solids. 2. Direction, pitch and quality of sounds. 3. Shape of the ear, internal ear, cleanliness of ear. 4. Care of ear ; cold draughts, pulling and shouting into. 5. Listening attentively and eaves-dropping.

XII.—*Nose and Smell*. 1. Odors ; pungent, aromatic, spicy, etc. 2. Use of smells, determining good food, pure air, etc. 3. Scent in animals compared with smell in man. 4. Colds, draughts, ventilation, cleanliness, etc.

XIII.—*Tongue and Taste*. 1. Tongue and saliva. 2. Kinds of flavors ; bitter, sweet, astringent, etc. 3. Chewing gum, tobacco, etc. 4. Hot and strong drinks. 5. Thirst and proper time to drink.

XIV.—*Touch*. 1. Use of fingers and delicacy of touch. 2. Rough, smooth, etc. ; cold, hot, etc. ; shape, size, etc. 3. Cleanliness, blisters, callouses, etc.

FOURTH YEAR.

XV.—*Teeth*. 1. Enamel, crown, root. 2. Cutting teeth, eye-teeth and double teeth. 3. Two sets, shedding, number. 4. Cleansing, how and how often. 5. Effects of hot drinks, candy, pickles, biting hard substances, etc.

XVI.—*Skeleton*. 1. Skull, spine, ribs, etc. 2. Structure of bones, hollow and light. 3. Kinds of joints, why joints move easily ; danger from pulling.

XVII.—*Muscles*. 1. Appearance ; lean meat. 2. Attachment to bones. 3. Action of muscles. 4. Exercise, proper kinds of play, work and rest.

XVIII.—*Skin*. 1. Elasticity, pores, perspiration. 2. Cold draughts, proper clothing. 3. Cleanliness, bathing, dandruff, etc.

XIX.—*Circulation*. 1. Where the blood is, uses of the blood and heart, and the pulse. 2. Arteries, veins. 3. Tight bands, tight clothes, warmth, exercise, wounds.

XX.—*Respiration*. 1. Pure and impure blood, windpipe and lungs, how to breathe. 2. Pure air and how to get it. 3. Odors and dust, clean bodies and clothes, and out-of-door exercise.

XXI.—*Digestion*. 1. Use of teeth and saliva, eating slowly, drinking when eating. 2. Proper kinds of food and drink; tea, candy, pickles, etc. 3. Regular and late meals, chewing gum, etc.

FIFTH YEAR.

Digestion. Anatomy, physiology and hygiene of the digestive organs. Foods. Effects of Alcohol. Circulation. Anatomy of the organs. Physiology and hygiene.

SIXTH YEAR.

Review work of Grade 5. Respiration, Anatomy, physiology and hygiene. Respiration in aquatic animals. Dress. Ventilation. Disinfection. Nervous system. Stimulants and narcotics.

SEVENTH YEAR.

Review. Special study of the eye and the senses of hearing, smelling and tasting.

EIGHTH YEAR.

Review. The Skin. Bathing. Clothing. Bones and muscles. Exercise.

NINTH YEAR.

Review of the whole subject with text books. Emergencies.

MUSIC.

[Prepared by George D. Whittier.]

FIRST YEAR.

Study of scale as a whole, parts in relation to the whole, parts in relation to each other. Sounds from dictation, easy skips on modulator. Rote songs from First Reader.

SECOND YEAR.

A daily drill on modulator in all keys. Singing exercises using vowels. Learn pictures of keys. Chart No. 1. Learn pitch names on staff. Rote songs reviewed often.

THIRD YEAR.

Begin First Reader. Two part singing from scale ladder. All exercises to be vocalized with different vowels. Chromatic scale.

FOURTH YEAR.

Writing exercises in different keys from dictation. A thorough study of time. Two part singing from Second Reader.

FIFTH YEAR.

Second Reader, part first reviewed, used in connection with part second. Chart No. 2. Different forms of Minor scale to be sung from dictation. A thorough drill on Chromatic scale, using vowels. Study bass clef, last part of Second Reader and on Chart No. 2.

SIXTH AND SEVENTH YEARS.

Second Chart with Second Reader, using bass clef. Singing from sight in three parts.

EIGHTH AND NINTH YEARS.

Third Reader, part first. Review Chart No. 2. Sight reading. Third Reader, part second. Four part songs. A careful review is often given in this grade to establish the object of the Third Reader, viz: transition. The voices are selected for the tenor at this time. Complete Third Reader. Cecilian Series, III.
